

DIRECTOR COURSE #970.1 THE ROLE OF RENEWABLES IN POWER SUPPLY

Date:
Saturday, October 3, 2009

Time:
9:00 a.m. - 4:00 p.m.

Location:
The Peaks Resort
Telluride, Colorado

Instructor:
Wallace Barron

Fee:
No charge for Colorado
directors
\$200 for out-of-state
directors

Course Description: Electric cooperative boards are faced with many important questions about renewable energy: What role should renewables play in our power supply portfolio? How should our co-op respond to member requests for green power? What factors should be considered when purchasing power from members with renewable generation capacity? What are the key regulations and laws pertaining to renewable energy and how do they affect our co-op? This course will make directors aware of the issues related to establishing policy that will guide their cooperatives in addressing renewables.

Key topics include:

- Trends in renewables
- Integrating the realities of renewable energy into power supply
- Communicating to your membership and others about your renewables program

Credit: One credit toward NRECA's Board Leadership Certificate will be given upon the successful completion of this class

To Register: Mark the appropriate box on the CREA Annual Meeting registration form or contact Liz Fiddes at the CREA office (303) 455-2700 ext. 103 or e-mail at liz@coloradorea.org
